

## Proof of Technology Invitation

**WebSphere** software

### Transforming Insight into Action with Business Process Management

**When?** One day **free of charge** session on **May 27, 2010** from 9:00 to 17:00

---

**Who?** Customers

---

**Where?** IBM Forum Brussels, Avenue du Bourget / Bourgetlaan 42, 1130 Brussels

---

**Why?** This Proof of Technology (PoT) leads attendees through several capabilities of IBM® WebSphere® Business Process Management (BPM) tools to help business and IT users gain insight into processes and take relevant actions.

Participants will review and collaborate on a process model. As the process runs, key performance indicators, alerts and process data will be used to analyze the process results. Multiple actions will be demonstrated in response to different scenarios. Some configuration and setup examples are included. This session allows to see and experience examples where WebSphere BPM tools are used to inspect, display and summarize process behavior and performance and initiate or change process actions.

Attendees will be able to identify some significant ways WebSphere BPM can bring value to your organization in gaining process insight and taking action.

On the agenda:

- Objectives
  - Value of Transforming Insight into Action with BPM
  - Typical Challenges
  - WebSphere BPM – capabilities overview for transforming insight into action
  - Labs: Insight from process review and collaboration; Insight from process monitoring; Taking Actions, Configuration and Setup Examples
- 

**Offered by the IBM TEC in partnership with:**

**IBM**  
Technical Exploration Center

For more information and to enroll: [www.ibm.com/events/be](http://www.ibm.com/events/be)

A Proof of Technology, PoT, is a **free of charge** workshop designed to give attendees a "deep dive" of the technology through demonstration, presentation, and hands on labs. An Exploration of Technology, EoT, is a complementary offering to the Proof of Technology program. EoTs are designed to give attendees a small "taste" of the technology through demonstration, presentation, and a high level discussion of the technology.
