

Proof of Technology Invitation

WebSphere software

End-to-end Process Automation with Business Process Management

When? One day **free of charge** session on **March 25, 2010** from 9:00 to 17:00

Who? Customers

Where? IBM Forum Brussels, Avenue du Bourget / Bourgetlaan 42, 1130 Brussels

Why? In today's business environment, business innovation and flexibility are essential for success. Business Process Management (BPM) helps accelerate process improvements, and facilitates business innovation and agility. Business flexibility allows you to quickly react to changes in your business environment. You can more effectively exploit new market opportunities, adapt to customer demands, and handle competitive threats. Innovation is about change, and Business Process Management enabled by the Service Oriented Architecture (SOA) makes it easier to change. IBM® Business Process Management enabled by SOA provides the IT flexibility required for business flexibility.

The End-to-End Process Automation business adoption pattern showcases how to improve operating efficiency and reduce cost using products from the WebSphere® Business Process Management software portfolio. It enables businesses to choreograph processes across disparate applications, people, and systems to remove inefficiencies, deliver cost reductions, and boost productivity.

This Proof of Technology is intended for organizations that require business agility through effective business process management. This session focuses on end-to-end process automation enabled by SOA using WebSphere BPM products. Participants will experience how to implement a dynamic business process from end-to-end, and from the ground up. They will learn how to model, assemble, deploy, manage, and monitor this new process with proper governance applied.

On the agenda: Overview of Business Process Management; Lab 1 – Defining Your Process; Lab 2 – Assemble your Process; Interactive Process Design; Exception Handling; Lab 3 – Process Visibility & Management; Wrap-up

Offered by the IBM TEC in partnership with:

Technical Exploration Center

For more information and to enroll: www.ibm.com/events/be

A Proof of Technology, PoT, is a **free of charge** workshop designed to give attendees a "deep dive" of the technology through demonstration, presentation, and hands on labs. An Exploration of Technology, EoT, is a complementary offering to the Proof of Technology program. EoTs are designed to give attendees a small "taste" of the technology through demonstration, presentation, and a high level discussion of the technology.
